- Leveraged knowledge of front-end technologies and design principles to enhance user experience & make 25% more traffic

ACHIEVEMENTS

- selected as contributor among 100K participant in Gssoc'2023 z
- Secured rank 763 out of 30k+ participants in leetcode contest
- Successfully merged over 10 Pull Requests in open-source projects.
- top 20 at Gfg under College & top 20.9% globally on Leetcode
- Solved 1200+ coding problems on different coding Platforms Leetcode , GFG HackerRank codingStudios
- Participate inGoogle Qwiklabs cloud facilitator program & obtain 2 swags
- Secured under top 50 among rank in Techathon organised by Ineuron

TECHNICAL SKILLS

Reactjs	Nodejs	Expressjs	MongoDB	TailwindCSS
BootStrap	Java	Javascript	HTML	CSS	SQL
handlebars	Rest Api , Git	Github	PostgreSQL
MySql	AWS	Cloud Computing	Vuejs	Vitejs
Docker

COURSEWORK

- Data Structures and Algorithms
- Object- Oriented Programming
- Software Engineering
- Operating Systems
- Computer Network
- Database Management Systems
- Cloud computing

EDUCATION

B.Tech. (IT) - 7.78 CGPA
ABES Engineering College ,Ghaziabad

📅 sept 2020 – 2024

Higher Secondary - 69%
St. Joseph Inter College

📅 2018 · Lucknow

Secondary - 82 %
St. Theresa's High School

📅 2016 · Sandila

PROJECTS

Meals delivery App
- Developed a food ordering website with subscription plans, allowing users to purchase meals for different situations, while incorporating features such as real-time rating, reviews, and monthly billing for subscribed users. Utilized JSON Web Token (JWT) for user authorization during login.
- Utilized hooks, API routing, authentication, and REST API to create a user-friendly platform that simplifies the lives of its users by serving their food ordering needs.

CometChat messaging Application
- Developed a clone of Discord, a real-time chat application with features like roles, video channel rooms, and a user-friendly interface. Built using React, Redux, Socket.io, React Routing, MongoDB, and Material UI.
- Implemented real-time communication using Socket.io for instant messaging and updates.
- Integrated React Routing with error handling and implemented a Discord-like loading screen between pages.

google docs clone
- Developed a web application using ReactJS that enables users to edit and manipulate text within HTML elements using the document contentEditable function.
- Demonstrated proficiency in front-end development, HTML, ReactJS, and CSS styling to deliver a seamless text editing experience for users.

CERTIFICATION

- MERN+JAVA DSA by pepcoding
- AWS Cloud Practitioner
- Java basic
- Javascript basic and course from udemy
- Computer Networks
